Please let us know if you need the sides or not

Helpful hints

When measuring your yard for a tent be sure to add 4ft. around the perimeter of the tent for the stakes. For example if you were to measure for a 20x20 you would measure a 28x28 area. Also please let us know if the tent is going on grass or asphalt / cement.

Delivery / Pickup

Before setup your balance must be paid two weeks prior to your event. There are additional charges for the crew to setup table and chairs. If you ordered sides and don't use them please place them in a dry area. On pickup day please have equipment broken down and stacked the way they were dropped off. Please have tables and chairs whipped down.

Damaged or loss

Once the crew leaves the customers is responsible for the equipment. Anything damaged or neglected by customer may result in a charge for the damage. Anything missing may also result in a charge for the lost or stolen item.
